IRAS 248493 - REC WM/18/0394 - CPMS 40368

- PATRN's 2018-19 national NIHR Portfolio prospective cohort study
- Data will be collected from theatres and the post-op recovery area
- Nationally, data will be collected from 9th September to 6th Oct 2019
- Your local 7-day data collection window is:

PEACHY aims to study:

1. The prevalence of obesity in UK children attending for surgery
2. Whether obese children are at increased risk of adverse perioperative events
3. Variation in perioperative paracetamol dosing for overweight/obese children
